-more-

Tennessee has made a commitment to promoting good health in children from birth until age 21. It's called the TENNderCARE program. This program is the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Program for Tenn Care recipients.

TENNderCARE is a full program of check ups and health care services for children who have TennCare. These services make sure babies, children, teens and young adults receive the health care they need. Good health begins at birth, so it's important to receive routine check ups and immunizations.

The purpose of TENNderCARE is to assure the availability and accessibility of required health care resources and to help TennCare eligible children (under the age of 21) and their parents or guardians effectively use these resources. The Community Health Outreach Workers will be working closely with parents or guardians helping them to secure appropriate health care for their children.
